

Hossein Khalili

Senior Frontend Engineer

iamhosseinkhalili@gmail.com · +98 903 922 8802 · linkedin.com/in/iamhosseinkhalili · github.com/hos715 · t.me/iamhosseinkhalili

SUMMARY

Senior frontend engineer (since 2018) for complex production web applications. I build React / Next.js / TypeScript UIs for real-time trading, crypto and fintech products, multi-role dashboards, and data-heavy admin tools — with WebSocket, Socket.io, and SignalR wired into reliable client state (Redux, Zustand, TanStack Query). Owns frontend architecture from landing through authenticated product surfaces. Expanding into full-stack with NestJS on real projects — learning and shipping, not claiming backend expertise.

SKILLS

Core JavaScript, TypeScript, React.js, Next.js
State & data Redux, Zustand, REST API, WebSocket (Socket.io, SignalR), TanStack Query
UI Tailwind CSS, Radix UI, ShadCN, Material UI, Ant Design, SCSS
Tools Git, Agile / Scrum
AI (project-scoped) OpenAI, Llama, image processing
Learning NestJS, Node.js backend patterns

EXPERIENCE

Graphay Sep 2025 – Present
Frontend Developer, Freelance Remote

- Frontend development for Graphay React products — production web applications across AI-assisted and product surfaces.

Techsnoval Oct 2024 – Sep 2025
Frontend Developer, Contract Remote · Sari, Mazandaran, Iran

- Built the full frontend for an AI customer-service product (teechats.com): embeddable widget (AI assistant with business rules and human handoff) plus admin for rules, analytics, and live-support takeover.
- Real-time chat UI with SignalR — typing indicators, message queue, and RBAC-aware roles (React, TypeScript, Zustand).

Graphay May 2023 – Dec 2024
Frontend Developer, Part-time Remote

- Led frontend architecture for arz.me (barman-tech / Graphay): SEO landing and authenticated exchange app — wallet, buy/sell, live prices, support. Socket.io market feeds; Next.js, TypeScript, Zustand, TanStack Query.
- Frontend for AI chatbot products (Llama / OpenAI) — real-time chat UIs, image-processing integrations, and related Graphay Octopus plugin surfaces.
- Adgame Telegram mini-app (miniapp.adgame.fun): Telegram SDK, TON Connect wallet UI, ads / referral / leaderboard (React, Vite, Zustand, TanStack Query).

Detifi Mar 2024 – Aug 2024
Senior Frontend Developer, Contract London Area, UK

- Frontend for an AI crypto-research product (insights, chatbot, landing), including UX/accessibility on data-heavy investor screens. React / JavaScript frontend — not independent market analysis.

Takanesh Academy May 2023 – Aug 2023
Frontend Developer, Part-time Tehran, Iran

- Implemented Figma designs, features, and performance fixes on existing product UI; image-transform / canvas work and related asset flows for an image-generation product aimed at Iranian users.

Arsalweb Startup Development CO.

Frontend Developer, Contract

Jul 2022 – Feb 2023
Remote · Khuzestan, Iran

- Built the Ronda24 hypermarket PWA (Next.js, Tailwind): customer shopping plus organization and logistics panels.
- Implemented organization-management UI and a statistics panel (daily / weekly / monthly sales, open orders, customers, revenue).
- Shipped two PWA features — shopping history and repurchase of a previous cart — associated with about a 10% sales increase.
- Refactored and debugged production panels (live ops, monitoring, inventory) and conversion-focused landing pages.

PARSDATA

Frontend Developer, Contract

Feb 2022 – Aug 2022
Tehran Province, Iran

- Frontend for the parsdata.com marketplace: listings, seller dashboard, and multi-step checkout (React, Next.js, TypeScript) — marketplace UI, not the company's hosting / CMS product line.

Mark It Done

Frontend Web Developer, Contract

Dec 2020 – Nov 2021
Los Angeles, CA, United States

- Frontend for client work in a design / dev / PM team (markitdone.com): WordPress themes and plugins, Shopify storefronts, and custom software UI — as a frontend contributor, not the agency.

alborztd.ir

Frontend Web Developer

Dec 2018 – Sep 2020
On-site · Sari, Mazandaran, Iran

- Frontend for a narcotic-drug control application for Mazandaran province, used by 400+ centers and 20,000+ patients.
- Appointment UI for patients to receive medicines; monthly consumption checks; per-center consumption reporting (HTML, CSS, jQuery).

alborztd.ir

Frontend Web Developer

Aug 2016 – May 2017
Sari, Mazandaran, Iran

- Frontend web development with HTML and CSS. Earlier tenure at the same company.

SELECTED PROJECTS

Crypto Exchange — arz.me

Led frontend architecture from scratch: public landing + authenticated trading (wallet, buy/sell, support). Socket.io live markets. Next.js, TypeScript, Zustand, TanStack Query.

Crypto Exchange — xpay.co

User trading SPA (app.xpay.co), ops admin, and public digital receipts (viral-team). SignalR live updates, Redux Toolkit, Ant Design; RTL and Jalali date UX.

Multi-Panel E-Commerce

Admin, warehouse, basket-picker, postman, storefront, and PWA on one shared order domain. Next.js, Redux, TypeScript. Internal delivery — no public marketing URL.

Additional production work

VisaPay (visapay.me), SwapNet (swapnet.app), Adgame (miniapp.adgame.fun), Ariascale (ariascale.ir), PSPro (pspro.ir), Ketabfeed (ketabfeed.com), and internal exchange UI (EppoChange).

EDUCATION

Bachelor of Software Engineering — HADAF University of Mazandaran (2015)

ADDITIONAL

Languages: Persian (native), English. Six LinkedIn recommendations.
